**Python Course**

- Udemy

## Professional Summary

- Results-driven No-Code Developer with 1–2 years of hands-on experience designing and delivering automation solutions across SaaS, e-commerce, and marketing industries. Self-taught with a strong practical foundation built through real-world client work and independent project development.
- Deep expertise in Airtable – including Tables, Interfaces, and Automations – and proven proficiency in building scalable, reliable workflows using n8n. Skilled in API integrations, webhook configuration, and multi-platform connectivity to ensure seamless, real-time data flow across systems. Experienced with Google Cloud Platform, Google Workspace, and MCP integrations.
- Beyond automation, has independently developed 3 full websites using Claude Code, one of which is live in production – demonstrating the ability to bridge automation and web development into complete, end-to-end digital solutions. Known for a structured, architecture-first mindset that reduces errors and drives long-term operational consistency across projects.

## Experience

- Ibra Digital Group – Remote  
| Oct 2025 - Present

## Projects Delivered

- Built and launched thehotspot.in, an AI-powered outreach platform for affiliate marketers and business development teams, enabling contact management, automated campaigns, lead generation, and performance tracking through intelligent workflows.
- Blog Report Generator Automation(Extracts Transcript from a video and creates a Blog Report with Images)
- SEO Agent Automation (Search engine Optimized, Humanized Writing Framework)
- Social Media Automation (Competitor analysis, Generate Posts For Different Platform)

Not limited to listed projects – I design custom breakthrough automations based on any workflow, API, data source, or business requirement.
